Are you typical?
Make yourself at home...
One Size Fits One

- **User interfaces** that can adapt to the needs, preferences, tastes of learners—feel at home
- **Content that fits**—delivered in a form that learners can understand and use
- **Open Content** enables adaptability
An open community for designers, users, accessibility folks, and all the other people who don’t usually fit into open source.

fluidproject.org
Tools and advice for creating personalized, inclusive open educational resources.

floeproject.org
Research and designs enabling learners to discover, edit, and refine their personal needs and preferences.

http://wiki.fluidproject.org/display/fluid/Preferences+for+Global+Access
A network of OER, tools for sharing curriculum with the world, and news and training on the brave new world of open education.

User Interface Options
Problems & Needs

The Internet is no longer optional, but many can’t use it.

Computers are everywhere, but accessibility isn’t.
Problems & Needs

THE COST OF AT

IS TOO DAMN HIGH
Problems & Needs

We are in a new era of cross platform diversity.
GPII in a Nutshell

- Discover, edit and refine needs and preferences
- Securely store and share in the cloud
- Automatically personalize desktop, mobile, and web
- Get help when you need it (assistance on demand)
- Reduce the cost and complexity of developing accessible software
GPII

- Windows
- Linux
- Android
- ...
Work in Progress

- UIO mobile
- PMT/PCP
- Simplification
- Self Voicing
