

Build a Custom Infusion v1.3 Package

Select: [All](#) [None](#)

Base Modules

- Infusion Framework Core
A suite of core Infusion framework features. Required by all Fluid components.
- Fluid Skinning System
A modular, pure CSS framework for rapid styling of layout, themes, and text.
- Renderer
Dynamically renders HTML templates on the client-side, without requiring you to mix your code and markup together.
- Progressive Enhancement
Enhance components based on the capabilities of the browser.

Presentation Components

- Table of Contents
Generates and presents a table of contents from any HTML page.
- User Interface Options
Users customize their preferences and needs for viewing content.

Interactive Components

- Inline Edit
Edit text without changing context.
- Pager
A customizable and accessible interface for navigating and sorting paged data.
- Progress
Show duration of long-running tasks with a linear progress indicator.
- Reorderer
Reposition content using the mouse or the keyboard.
- Uploader
Upload single files, batches of files, and large files while visually indicating duration.

Supporting Components

- Tooltip
A wrapper for the jQuery ui tooltip
- Undo
Undo or redo changes for model-based interactions.

Additional Third Party Modules

- XML for Script's Fast XML Pull Parser vX.X
- JSON Parser vX.X
- jQuery vX.X
- jQuery UI Core vX.X
- jQuery UI Widgets vX.X
- jQuery Tooltip Plugin vX.X
- jQuery bgiframe Plugin vX.X
- SWFUpload vX.X
- swfobject vX.X

Download

 **Download Minified Package**

Deployment optimized.

 **Download Source Package**

Larger but human-readable.
