

## \* A floe project component demo

### Floe Metadata Authoring

This component allows content authors to create or edit metadata that accompanies the content of their OER.

#### INSTRUCTIONS

First choose whether to edit the existing resource or start a new one. The screen will change and there will be a text editor.

- Insert a video by typing some text in the web address field.
- Select "Preview" to see an example of how the end user would see the content.
- Select "View Output HTML" to see the HTML mark-up with included metadata.

## Video Details

Climate changes are underway in the United States and are projected to grow.

Global temperature has increased over the past 50 years, primarily due to human behaviors that release heat-trapping gases, like carbon dioxide.

Widespread climate-related impacts are occurring now and are expected to increase.

Changes are happening in the United States, and elsewhere, but the impacts vary from region to region. These changes are affecting sectors of our society that cross regional boundaries. Already impacted are things that we depend upon; water, energy, trans-

### Audio

- Yes, this video has an audio track.
- No, this video has no audio track.
- I am not sure if this video has an audio track.

### Captions

*Captions provide a synchronized, equivalent text version of spoken word in a video.*

Enter web link to caption:
