Welcome!

This tool will make using a computer easier.

If you need help at any time, press the H key or select the help button.

OK, let’s begin
Do you prefer to have items on the screen read out loud to you?

Yes
No

If the user has previously turned the audio off, this would default to No, but would still give the user a chance to consider whether this preference might be helpful to them.
Adjust the voice volume to a comfortable level.

max

min

Seems like we don’t want a general volume preference, but do we want to give the user the ability to set voice volume here, because we can’t assume they can do it directly on the device?

Also - we need to be able to hide and show this screen as needed if the user turns the voice off and on...
Adjust the text to a size that you like best.

max

min

adjuster buttons do not change size, so that the targets do not move.
You can choose a screen color to make things easier to see.

- no change
- black on white
- white on black
You have completed all the steps! Please confirm your preferences:

Language: English
Text Size: med-large
Voicing: ON
Screen Color: no change

We noticed that you skipped a step. You can go back, or you can confirm your preferences now:

Language: English
Text Size: largest
Voicing: ON
Screen Color: no change

If volume is not a preference, it shouldn't show up in this list, which could be confusing, especially if it has a separate icon.
Congratulations!

Your preferences have been saved to your account.
Touch the buttons on the screen to make a selection

Button Examples

[Diagram of hands touching buttons with symbols: +, On, Right Arrow]
To move around the screen, use the arrow keys on your keyboard.

To select, use the space bar on your keyboard.

You can also use a mouse to move around the screen and use the pointer to select.
