

June 16, 2017 Meeting with Karisma + FUTCO + IDRC

Juliana, Carolina, Silvia, Jutta, Jess, Dana, Alan

- Silvia - OERs:
- Tools and methodology

- People moving to cities
- Want to promote diversity
- Jutta - How can OER be packaged in a way that works outside of schools, in a youth group environment - will affect how they are packaged and designed
- Youth groups themselves driving what is needed
- Work with indigenous community in Cauca and African communities close to Cartagena

- How much overhead will the university take and who will pay for that? From whose budget will it be paid? 10%?
- Carolina and Silvia can discuss together
- Line items to Oak - we can include it there

- Adapting resources to particular group or context
- Karisma identified grassroots communities - DIY tech etc - how to work with academic institution? We don't want to change that - working with grassroots groups much in alignment with Oak
- We just need to adapt / integrate the two
- Silvia - wants to work closely with the communities
- This is not an academic research project!
- Jutta will send comments based on this discussion
- Juliana and Silvia will meet to discuss how to create communal plan - not set in stone - want to hear from youth groups so we need some flexibility
