

(SJRK) November 6, 2018 Partners Meeting

Avtar, Dana, James, Michelle, Silvia, Tata

- Welcome Tata!
- Introductions
- Avtar - website designs <https://files.inclusivedesign.ca/s/MQ5n1mlALfb86Nw>
 - What about translation? How will it be handled?
 - will use UIO for translation
 - we can create auto-translations, but will need help to clean it up
 - Silvia - we can help with that
 - UX testing of the website?
 - Avtar - mostly just through partner meetings, face 2 face meeting
 - soliciting on the mailing list for content etc
 - soliciting feedback on the site itself - feedback through iteration
 - Resource page could be similar to the Floe Resources example
 - <https://floeproject.org/resources.html>
 - Structure is clear, easy to follow
 - James - will need to work with UWEZO to contextualize content and to translate
 - Maybe hiring local translators?
 - Need to add Bahati to the mailing list (Dana) - to invite to our meetings and engage him in the conversation about using the site in context of Rwanda
 - UWEZO - coordinator of other youth organisations too
 - Next contract will be with UWEZO ?
 - Phase I - identify youth orgs etc
 - Phase II - James' role is limited
 - Work directly with Bahati and UWEZO
 - Silvia - would be good to engage the youth movements in creating/editing the content
 - Content - Silvia - will create some topics (about groups etc) and we can review together
- Silvia - Github repo
 - Need help in terms of accessibility review
 - <http://cuentalo.org/>
 - <http://guardiaambiental.org/>
 - Difficulty with Wordpress templates - how to implement - how to improve accessibility
 - Gregor might be able to help when he gets back
 - Might be better for us to just go through the site and check it
 - Could we do a crit? Have Lisa there
 - Schedule soon
 - Why a private repo? No good reason
 - There are some groups in Colombia who want to use the code
 - What is the best way to share it? Put it in resources on site?
 - Maybe link to the Github repo would be best
 - Make it an open repo - Michelle can send info to help about how to do this, share examples
 - Resources page - write up a summary of the websites and add a link to Github repo
 - James - submitting report to get last phase of money
 - Waiting confirmation from IDRC - based on previous report
 - Need a brief update in terms of what James has done since then?
 - Follow up with Bahati - figure out how we will work together, and what the contract will look like
 - James sub-contracted UWEZO
 -
