

Fluid Engage

[Visit fluidengage.org](http://fluidengage.org) »

Fluid Engage is a continuation of the [Fluid Project Vision](#) in the context of museums and cultural institutions.

Description

Fluid Engage is a project that created an open source community to provide curators and educators within museums and galleries the necessary supports, tools and resources so they can:

- Create engaging visitor experiences across all three exhibit environments: the computer mediated physical space, online and through mobile devices.
- Provide accessible exhibits and experiences in these environments, thereby meeting legal commitments while at the same time making the experience more usable and engaging for all visitors.
- More seamlessly and efficiently integrate existing and new applications applied in museums to create engaging visitor experiences (content management system, collection management systems, maps, social software, mobile applications, and beyond)
- Bridge the gap between creative design vision and its expression in the digital realm and participate in the larger user experience design community.

The Grant
