Page	Antranig's Assessment
<a href="#">IoC - Inversion of Control</a>	needs more modern treatment and motivation
<a href="#">Why Inversion of Control</a>	not inaccurate but bland and unhelpful
<a href="#">Controlling The Timing of Subcomponent Creation</a>	ok but duplicates info in "Subcomponent Declaration", should be rationalised
<a href="#">Members</a>	ok but seems rather brief; should be rationalised wrt. "Component Configuration Options" etc.
<a href="#">Model Transformation</a>	ok but incredibly incomplete - we need to bring in info from <a href="http://wiki.gpii.net/index.php/Architecture_-_Available_transformation_functions">http://wiki.gpii.net/index.php/Architecture_-_Available_transformation_functions</a>
<a href="#">Transforms</a>	good start but incomplete
<a href="#">Transformation Rules</a>	hopeless
