

Uploader

Uploader

The Uploader allows users to upload files. The user can select desired files from their computer, view them in a queue, add or remove files to and from the queue, and upload them.

Features

- Allows selecting multiple files in a single OS-specific file dialog
- Shows the selected files in a queue
- Allows adding or removing files from the queue
- Provides complete progress information as the files upload
- Shows whether the files have been uploaded successfully or not
- The user interface is completely customizable in HTML. With the exception being the OS specific file open dialog.

Uploader - Progress Indicator

Error rendering macro 'html'

Your Confluence administrator has disallowed the use of Javascript in the HTML macro. This setting can be changed using HTML for Confluence Configuration. Please see your administrator for details.
