

Fluid Infusion Release Checklist

This document serves as a checklist of things to do during a new Infusion release

Wiki - Development:

- update component demo include files.
- update component tutorials on the wiki

Wiki - Components:

- update Components index
 - are the thumbnails up to date?
 - is the family of component hierarchy still valid?
- update component landing pages
 - are the descriptions up to date?
 - is the feature list complete? Any features removed or added?
 - is the progress indicator up to date?

Website - Components:

- Is the Component gallery up to date?
 - is the contents similar / identical to the current content on the Wiki?
 - do the links to demos and releases appropriate?
 - are the release information and links updated

Testing

- Have all of the components been tested
- Has the documentation been tested
- Has the release bundle been tested
