

# HTML5 and CSS3 Learning

Goal: Learn HTML5 and CSS3

Process: Implement new IDRC website designs

- IDRC site: what browsers will we aim for?

Things we'd like to try:

- letterpress effect
- masking

CSS3:

- Capabilities, new features, examples of other sites, demos, etc.
- Current level of support?
- Browser compatibility and graceful degradation?

Infusion:

- no decision yet
- options: 1) line in sand; 2) graceful degradation ("latest" for FF and Chrome, "latest" plus one back for IE)

## CSS3

Current support for some modules: IE9, latest Webkit, FF and Chrome.
