

(Floe) Video Player

[Video Player demo on the daily build site »](#)

The Floe Video Player is an inclusive, customizable HTML 5 video player component designed to deliver relevant and rich experiences.

Features:

- Multiple language caption support through Amara (<http://www.amara.org>).
- Synchronized and navigable transcripts that can control movie progress.
- Fully accessible - keyboard and screen reader tested.
- Degrades gracefully for feature-limited browsers.
