

fluid.arrayToHash

This functionality is [Sneak Peek](#) status. This means that the **APIs may change**. We welcome your feedback, ideas, and code, but please use caution if you use this new functionality.

fluid.arrayToHash(array)

Converts an array of strings into a map where the keys are the strings and the value is `true`.

```
fluid.arrayToHash(array);
```

File name: fluidRenderer.js

Parameters

array	(Array) Array of strings to convert into a hash map
--------------	---

Return Value

Value	description
	n

See Also

Example

```
var elementList = ["div", "tr", "li"];  
var map = fluid.arrayToHash(elementList);
```

In this example, `map` will result as:

```
{  
  div: true,  
  tr: true,  
  li: true  
}
```
