

LMS integration portlets or Higher Ed portlets project

Problem Space

Scenario

Student must go to 2+ LMS's to view his classes.

Persona: Ed

LMSs in a Portal

Problem to solve

- many LMS (or home grown web sites) required to cover all their classes
- required different places for each
- need comprehensive view
- take longer, harder to remember
- users need a sense of place and where they are in the process

Needs

- one stop / get there
- only remember one place
- summary of relevant info from LMS (let me know when I need to go there)
 - tests coming up, dry cleaning, dates, etc
 - schedule
 - assignments due
 - announcements
 - Not to have to think about where I need to go for different courses

Requirements

Connect to

- sakai
- blackboard
- home grown web sites

Show me my schedule

- changes over time
- one location and consistent format to see homework, tests, etc
- show's available for study group
- shared space for study materials
- schedule group meetings/events
