Global Settings

UI Localization

File Location	Description	See Also
decapod-ui/core/js/messages.js	The script that contains all of the strings used in the User Interfaces.	Decapod Administrator Guide

Css Files

File Location	Description
decapod-ui/core/styles/css/decapod.css	The generic decapod styles including the header, footer, title bar, main content area, etc.
decapod-ui/core/styles/css/help.css	The styles for help pages.
decapod-ui/core/styles/css/stereo.css	The styles shared by calibrate and dewarp user interfaces.

Calibrate

Calibrate Server

File Location	Description	See Also
decapod-server/calibrate/config/calibrateServer.conf	The server configuration.	Decapod 0.7 Cherrypy Server Configuration
decapod-server/calibrate/data/status.json	The status file that keeps track of the status of the calibration. Remove this file manually if the server is unexpectedly interrupted or terminates during the calibration process.	

Calibrate UI

File Location	Description	See Also
decapod-ui/calibrate/html/calibrator.html	The start point to launch UI.	

Capture

Capture Server

File Location	Description	See Also
decapod-server/capture/config/captureServer.conf	The server configuration.	Decapod 0.7 CherryPy Server Configuration
decapod-server/capture/data/stereo/captureStatus.json	The status file that keeps track of the status of the current capture index and the number of total captures. Check this file if the server returned data is not in sync with the actual captures.	

Capture UI

File Location	Description	See Also
decapod-ui/capture/html/capture.html	The start point to launch UI.	

Css Files

File Location	Description
decapod-ui/capture/css/capturer.css	The styles for capture user interface.

Dewarp

Dewarp Server

File Location	Description	See Also
decapod-server/dewarp/config/dewarpServer.conf	The server configuration.	Decapod 0.7 CherryPy Server Configuration
decapod-server/dewarp/data/status.json	The status file that keeps track of the status of dewarping. Remove this file manually if the server is unexpectedly interrupted or terminates during the dewarping process.	

Dewarp UI

File Location	Description	See Also
decapod-ui/dewarp/html/dewarper.html	The start point to launch UI.	

Export

Export Server

File Location	Description	See Also
decapod-server/export/config/exportServer.conf	The server configuration.	Decapod 0.7 CherryPy Server Configuration
decapod-server/export/library/book/export/pdf/exportStatus.json	The status file that keeps track of the status of dewarping. Remove this file manually if the server is unexpectedly interrupted or terminates during the PDF generation process.	

Export UI

File Location	Description	See Also
decapod-ui/export/components/exporter/html/exporter.html	The start point to launch UI.	

Css Files

File Location	Description
---------------	-------------

decapod-ui/export/components/exporter/css/exportControls.css	The styles for export controls and status text.
decapod-ui/export/components/exporter/css/exporter.css	The styles for uploader and accordion.
decapod-ui/export/components/exporter/css/exportInfo.css	The style for The label used in the export format's textual description.
decapod-ui/export/components/exporter/css/exportType.css	The styles for the PDF generation and output including the error output and the progress bar.
decapod-ui/export/components/exporter/css/pdfExporter.css	The styles for export file format options and controls.
