October 18, 2018 - Platform Coop - Team Update Meeting

- Identifying people to co-author the "personas" - freelancer, coop member etc
    - explain them in a way that makes sense to that group
- translation is tricky - 5 or so on the page now already - hope would be to have a google API
- Mozilla wants to support us - they became more concrete (not a huge amount of money)
    - can we ask them for something else?
- send email to all surveyists with "deadline" of end of next week (DA)
- communicating to the community is such an important part
    - therefore UX early in the process
    - telling them about it, getting them involved
- Jutta and Trebor had talked about having a tab/article on the site about "sleeping with the enemy" to explain why we are working with Google
- annotate with bullet points each site example for design sense (DA):
    - http://odimpact.org/
    - https://bwc.thelab.dc.gov/
    - https://womenplus.sourcelist.org/
    - Etc
- Timeline:
    - scheduling tool e.g.
    - start with a gut feel - provisional ideas - high level planning for the windows
    - scheduling is complex because of these reasons - we will refine
    - Can PCC provide a gut feel brain dump of the sorts of things we want in the scheduling tool, a governance tool - that will help us a lot
        - that's a bit difficult…it is out of our depth…we can write that down
    - if that's difficult than we have to treat the timelines differently

- We did get another grant - Distributed governance
    - hire 4 SEWA researchers
    - one from IDRC
- need more detail for reporting than what is on the wiki
    - Michael - the 5 questions:
    - 2-3 sentences per question, 5 questions
    - will help the research office - develop the scope of work - the WINDOWS of scoping
- in addition to the 2 tools:
    - MAP - survey - reaching out to find other projects not yet on the map
    - which standard, how compliant with other databases?
    - Jutta - data visualization of this to something that policy makers can use (show the data)
    - more features, more interoperability
- blog post about India - has details there - take a look
    - social network
    - making decisions
    - education
    - everyone add details - we will merge it all
- Need MILESTONES for research office (not timeline)
    - iterative plan - co-design every quarter e.g.
    - how many embedded co-design
    - for the tools - we will spend X amount of time on it
    - e.g. a tool we can build in 8 months
    - see Michelle's Trello board
