

# Scenario - Resuming Decapod Document and Exporting

## Intro

This end-to-end scenario is based on current understanding of the [Decapod Workflow](#) and [Decapod 1.0 Early Wireframes](#). Images are linked in from current wireframe documents.

### Missing Remastering

This keypath scenario is missing the remastering phase for output generation.

## Scenario: Resuming a Decapod Document and Exporting to PDF

<p>Decapod launched.</p> <p><b>? Unknown Attachment</b></p> <p>Reference: <a href="#">Decapod Dashboard</a></p>	<p>User selects "Archaeology of Early Buddhism", then presses Open.</p> <p><b>? Unknown Attachment</b></p> <p>Reference: <a href="#">Decapod Dashboard</a></p>
<p>The file opens. The image selected on the last save is selected upon loading.</p> <p><b>? Unknown Attachment</b></p> <p>Reference: <a href="#">Detailed and Thumbnail View</a></p>	<p>User wants to export to PDF and TIFF formats. Presses Save. The Save dialog appears over the faded interface.</p> <p><b>? Unknown Attachment</b></p>
<p>User selects Acrobat PDF and clicks Save.</p> <p><b>? Unknown Attachment</b></p>	<p>User is prompted for any additional information prior to continuing.</p> <p><b>? Unknown Attachment</b></p>
<p>Pressing Save begins the PDF generation process. The user is shown a progress dialog so they can better estimate for themselves how long the whole process is going to take.</p> <p><b>? Unknown Attachment</b></p>	<p>After saving the PDF file, the interface returns to a normal state but with a status message and the thumbnails/images all processed.</p> <p><b>? Unknown Attachment</b></p>
