

Testing Fluid Components

Testing Fluid Components Testing Methods

Currently there are two methods of testing:

- manual testing
 - see components panel to the right
- [unit testing](#)

Testing Environments

Browser	Version
Chrome	Latest Stable Release
Firefox	Latest Stable Release
Internet Explorer	Latest Stable Release
MS Edge	Latest Stable Release
Safari [fluid:1]	Latest Stable Release

[fluid:1] keyboard a11y can be slightly improved if you select the "all controls" option from "Keyboard Shortcuts" under the "Keyboard & Mouse" settings. May also need to use "option + tab" for tab navigation.

Reporting Bugs

Any bugs found should be reported in [Jira](#)

To reduce the chance of creating a duplicate bug report, it is a good idea to browse Jira first.

Reporting Format

All bug reports should include at least the following information

- Title of bug report
- The component it affects
- The version it affects
- A description of the bug
- steps to reproduce the bug

(See: [JIRA Best Practices](#))

Using Jira

Please enter the word as shown below:

Browsing

There are several ways to browse the bug reports in Jira.

Using the "Quick Search" field at the upper right corner, search by keyword(s).

QUICK SEARCH:

The "Home" page contains saved filters

[Configure](#) | [Help](#) | [Manage Profile](#)

Saved Filters (Create New Manage Filters)	
Current Dev Iteration (40): August 5 - 15	24
Current UX Iteration	29
Dev Iteration 33: May 13-26	10
Dev iteration 34: May 27-30	10
Dev Iteration 35: June 4 - 9 2008	10
Dev Iteration 36: June 10-16	7

The "Browse Project" page contains project level filters; e.g. by component, assignee, etc.

Select: [Open Issues](#) [Road Map](#) [Change Log](#) [Popular Issues](#) [Subversion Commits](#)

Components (with open issues in each component)		Versions (with open issues due to b
Client-side Renderer	3	0.5
Framework	8	0.6
General	2	Unscheduled
Infrastructure	22	
Inline Edit	57	
Keyboard Accessibility	35	

The "Find Issue" page allows for the creation of a custom query.

Creating a New Bug

Login, if you haven't already done so.

Click the "Create New Issue" link at the top of the page.

[CREATE NEW ISSUE](#)

For step 1 of 2, you can use the default selections. Click the 'Next' button to proceed to step 2 or 2.

Create Issue

Step 1 of 2: Choose the project and issue type...

* Project:

* Issue Type:

[Next>>](#) [Cancel](#)

In step 2 of 2 you will need to fill out the form and click the 'Create' button to complete. See [Reporting Bugs](#), for necessary information to include here.

Step 2 of 2: Enter the details of the issue...

Project: Fluid

Issue Type:  Bug

* Summary:

Priority: Major
