Page	Antranig's Assessment
IoC - Inversion of Control	needs more modern treatment and motivation
Why Inversion of Control	not inaccurate but bland and unhelpful
Controlling The Timing of Subcomponent Creation	ok but duplicates info in "Subcomponent Declaration", should be rationalised
Members	ok but seems rather brief; should be rationalised wrt. "Component Configuration Options" etc.
Model Transformation	ok but incredibly incomplete - we need to bring in info from http://wiki.gpii.net/index.php/Architecture_-_Available_transformation_functions
Transforms	good start but incomplete
Transformation Rules	hopeless
