

(Floe) Concept design mindmap problem space and inclusiveness in OERs

Floe concept design mindmap

Overview and goals

The following mindmap is a brainstorm of some of the ideas and considerations being captured for the proof of concept design.

This mindmap is intended to slice up the space in different ways, provide a general vibe for what the concept could/should/will be, and help inform and provide conversation for the design. It isn't intended to be fully exhaustive or complete.
