## Font Size

(Note that other sizes are also available. See the [FSS Cheat Sheet](#) for specifics.)

This paragraph is adjusted to 70% of regular size.

This paragraph is adjusted to 100% of regular size.

This paragraph is adjusted to 120% of regular size.

This paragraph is adjusted to 150% of regular size.

The markup and classes used to produce this example:

```
<p class="fl-font-size-70">This paragraph is adjusted to 70% of regular size.</p>
<p class="fl-font-size-100">This paragraph is adjusted to 100% of regular size.</p>
<p class="fl-font-size-120">This paragraph is adjusted to 120% of regular size.</p>
<p class="fl-font-size-150">This paragraph is adjusted to 150% of regular size.</p>
```

NOTE: The `fl-font-size-*` classes are applied to the paragraph tags and so apply only that paragraph. The class could be applied to a `<div>` surrounding many paragraphs to apply the style to all paragraphs.
