

# (C4A) Personal Control Panel Mockups & Notes

March 5, Wireframes of PCP use on a new device (laptop w/ existing settings)

April 4, Interactives PCP on a new device (personal phone w/ existing settings)

---

February 19, Wireframes of PCP use on new device (personal phone w/ existing settings)

## Initial Use

- Activating Cloud for All on personal device w/ device settings
  - Login
  - Use current device settings (*automatically named based on device*) or Apply Existing Set (*Matchmaker applies most appropriate set*)
  - Done or Edit
- Activating Cloud for All on public device w/ no device settings
  - Login (*Matchmaker applies most appropriate set*)
  - Done or Edit

## Subsequent Use: Editing preferences using PCP

- Modifying basic preferences
    - Select preference category icon (*visible icons determined by user behaviour and Matchmaker*)
    - Modify using primary adjuster
    - Exit PCP or Continue editing
  - Modifying advanced preferences
    - Select search or Select preference category icon
    - Enter search term or Select advanced preferences
    - Modify advanced preference
    - Close advance preference menu
    - Exit PCP or Continue editing
  - Switching preference sets
    - Activate preference set drop-down (*if a set that is used in other devices has been modified (e.g., base set), user is prompted to save first*)
    - Select preference set or Create new set
    - Exit PCP or Continue editing
  - Saving Modified Sets to switch sets (*single device subsets are automatically saved*)
    - Select Modified Base Set
    - Save to Base Set or Save as device set or Delete changes
    - Exit PCP or Continue editing
-
