

Decapod License

Overview

Decapod is released under the [Apache 2 license](#), making it widely compatible with a variety of open source licenses as well as commercial code.

All documentation is available under a [Creative Commons Attribution License](#).

Contributor License Agreements

The Fluid community asks each contributor to sign a Contributor License Agreement, which provides a clear agreement to share code under terms amenable to Decapod's licensing strategy. In order to legally publish source code in the Decapod repository, the University of Toronto needs permission from the creators of the code and from the organizations for which they work. The following agreements are provided for this purpose:

- The [Individual Contributor License Agreement](#) (CLA) - to be signed by each code creator
- The [Corporate Contributor License Agreement](#) (CCLA) - to be signed by an appropriate person in the organization

Signed agreements should be faxed to Iris Neher at the IDRC at (416) 977-6000 ext 3951.

Source Code Licenses

- Decapod code is licensed under [Apache 2](#)
- OCRopus is also licensed under [Apache 2](#)
- Fluid Infusion is available under dual [ECL 2.0 and BSD licenses](#)

A comprehensive list of third-party dependencies for Decapod, along with their respective licenses, is available in the [Decapod README file](#) in our source code repository.
