Simple Text Inline Edit

Simple Text Inline Edit allows a user to do quick edits to simple text without having to switch modes or screens. All work is done on the same interface which helps the user maintain context. This component is part of the [Inline Edit](#) family of components.

Features

- Show original text
- Switch to a text field
- Display original text in a text field
- Save text changes
- Allow undo
- Allow redo

Simple Text Inline Edit - Progress Indicator
