What's New in Fluid Infusion 0.4beta1

New features of this release include:

- Preview versions of two new components:
 - [Inline Edit](#)
 - [Pager](#)
- Improvements to the [Uploader Design Overview](#) component

What is Fluid Infusion?

Fluid Infusion is a collection of rich, reusable, accessible user interface components built for the Web. These components have been designed by a cross-disciplinary team and thoroughly tested for usability and accessibility. By incorporating Fluid components into your web application's user interface, you will make your application easier to use by more people. Easier to use means happier users.

Features of Fluid Infusion 0.4beta1

- Upload multiple files easily.
- Allow users to break up long lists of items into separate pages.
- Allow users to edit content within the context of their work..
- Add the ability to reorder image thumbnails to your application.
- Reorder arbitrary DOM elements in your application.
- Keyboard accessibility for navigation and reordering.
- Learn helpful design tips from expert Interaction Designers.

Known Issues

Help us Build a Usable Web For Everyone

The Fluid Project is an open, collaborative development project. Our goal is to improve the user experience of community source web applications, so if you are a designer or developer and want to change the world, consider getting involved! The Fluid component library includes not only full source code but also a designer's toolkit that offers useful design, accessibility, and usability strategies and documentation, all backed by a growing community of interaction designers, user interface experts, and software developers contributing a wealth of expertise in usability and accessibility.

Licensing

Fluid code is licensed under a dual ECL 2.0 / BSD licence. The specific licences can be found on the Fluid wiki's [Infusion Licence Template](#) page.

Appreciation

Thanks to all the designers, developers, testers, and support folks who helped us get this release out the door!
