

# Uploader Storyboard - Upload with Error

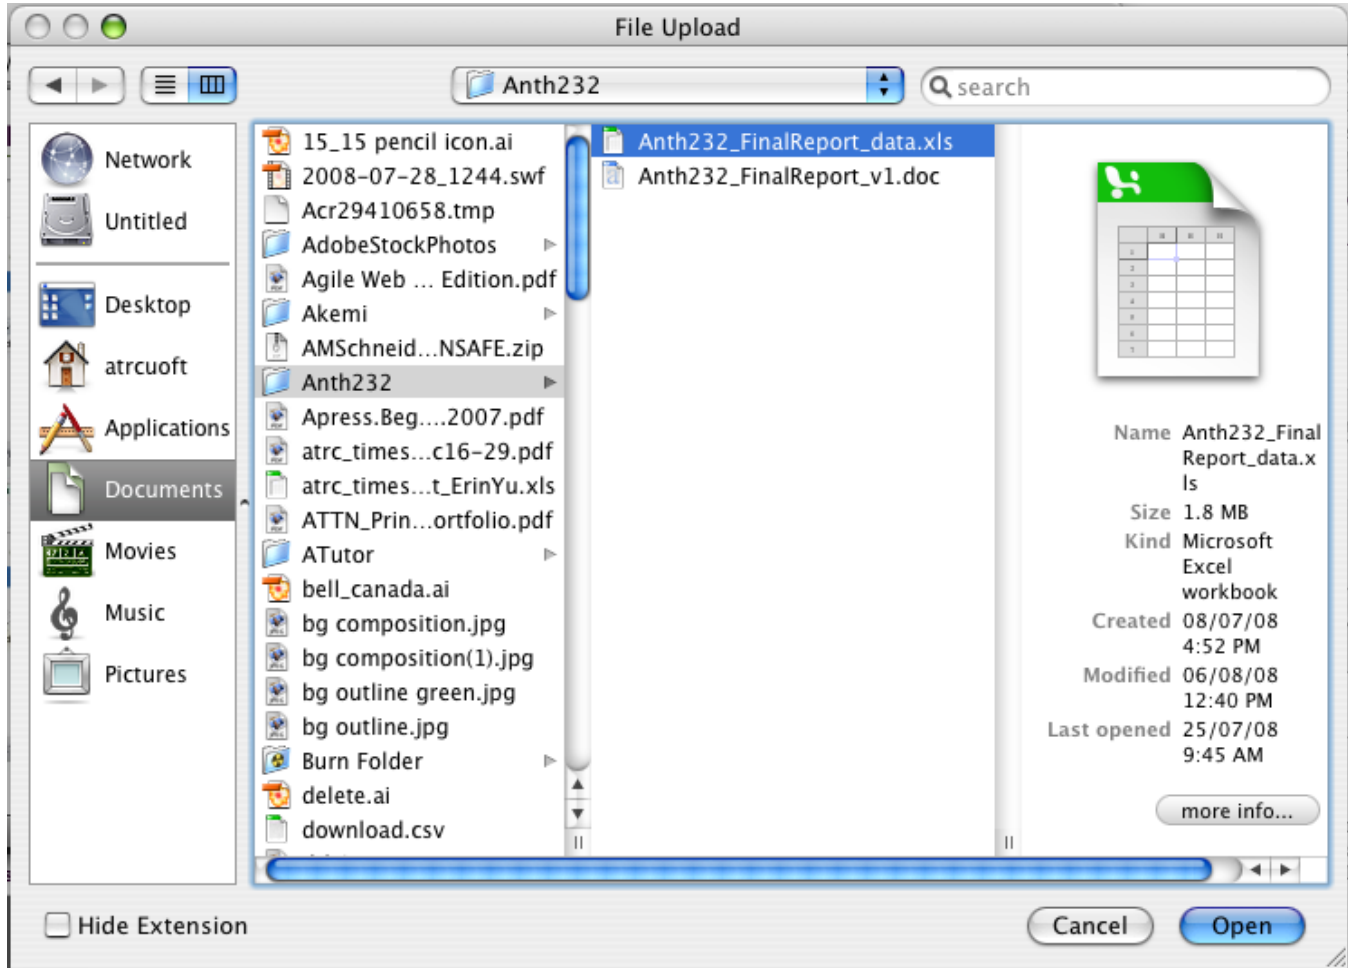

## File sharing (Student Secondary Scenario)

For a group project, Ashley's teammate, Fred, creates a project space on bSpace. To set up this collaboration area, Fred puts in a name and other details for the space, and enters the username of each team member to give them the authority to use the site. The team members use it mainly for sharing documents, whereas they prefer to use email and IM for communicating. On the group site, it is easy to see who uploads what and when, rather than sending the file around via email. Ashley finds an old report from the previous term and decides to use it as a template for the group report. She changes the title, deletes the old contents, adds her sections, and names the file as "FinalReport\_V1."

Ashley logs onto bSpace and finds the project group site.

Ashley goes to the document sharing page.

She clicks on Add Files button.

She selects her version of the final report and the supplementary files.
