

Reorderer

This component is in [Production status](#)

The Reorderer allows developers to create rich, accessible user interfaces which enables users to directly re-arrange content on the page. It is the base grade for several "flavours" of reorderer, listed in the "See Also" panel to the right.

Features

Change the arrangement of elements using mouse or keyboard.

Convenient options for rearranging elements contained in a list, grid, a layout, and image gallery.

Configurable drag and drop appearance and behaviour.
