

# Video Player QA Test Plan

## Video Player QA Test Plan

### Environments

Unable to render {include} The included page could not be found.

### General QA Guidelines

#### General Use

- Does the tool behave the way that you would expect?
- Are you surprised by anything?
- Does something take longer than you would expect?
- When the tool does something unexpected or takes too long to do something, does the tool provide appropriate feedback?

#### On This Page

## QA Tests

### Protocol

Perform the following tests using each browser/system environment. Report issues at: <http://issues.fluidproject.org/secure/Dashboard.jspa>

Please search for issues before reporting them, so as to limit the number of duplicate entries: [Video Player JIRA Filter](#)

Currently known issues are indicated on this page by their JIRA number.

- If you note during your testing that an issue has been resolved, please edit this page and remove the JIRA number.
- If you file a JIRA for a new issue, please edit this page and add the JIRA number beside the relevant 'expected result.'

## Unit Test

### Protocol

Launch the following website to execute unit tests.

Video Player Test Suite:

<http://build.fluidproject.org/videoPlayer/videoPlayer/tests/all-tests.html>

## Manual Tests

### Description

Ensures that the component properly functions on the aspects that are not covered by the integration test.

### Protocol

Perform these tasks on the following site, perform the tests in order.

Video player sample:

[One video player per page](#)

[Multiple video players per page](#)

## Mouse Functionality

### Page Load, Basic Play/Pause

Procedure	Expected Results
Load the "One video player per page" demo in a browser window.	<ul style="list-style-type: none"> <li>Page should show video player container.</li> <li>Video should not play automatically.</li> <li>Video player container should show a symbol overlay. <a href="#">FLUID-4599</a></li> <li>Control menu should not be visible.</li> <li>Transcript area should not be visible.</li> <li>Captions should not be displayed.</li> </ul>
Using the mouse, hover over the video player.	<ul style="list-style-type: none"> <li>On hover, the scrubber bar and control buttons should appear.</li> <li>Play symbol overlay should not disappear. <a href="#">FLUID-4599</a></li> </ul>
Move the mouse away from the video player.	<ul style="list-style-type: none"> <li>Scrubber bar and control buttons should disappear. <a href="#">FLUID-4652</a></li> <li>Play symbol overlay should remain. <a href="#">FLUID-4599</a></li> </ul>
Click somewhere in the centre of the video area. Leave the cursor over the video area.	<ul style="list-style-type: none"> <li>Play symbol overlay should disappear.</li> <li>Video should play.</li> <li>Play symbol on the Play/Pause button at the left end of the control buttons should change to a Pause symbol.</li> </ul>
Click again somewhere near the centre of the video area	<ul style="list-style-type: none"> <li>Video should stop playing.</li> <li>Play symbol overlay should NOT re-appear. <a href="#">VP-273</a></li> <li>Pause symbol on the Play/Pause button at the left end of the control buttons should change to a Play symbol.</li> </ul>

### Controls: Play Button

Procedure	Expected Results
Move the mouse cursor over the video; controls will appear. Hover over the Play button.	<ul style="list-style-type: none"> <li>Play button should get a darker background.</li> <li>Tooltip containing "Play" should appear near the Play button.</li> </ul>
Click on the Play button. Keep mouse positioned over the button.	<ul style="list-style-type: none"> <li>Video should play.</li> <li>Play button should change to a Pause button.</li> <li>Tooltip text should change to contain "Pause".</li> </ul>
Click the Pause button.	<ul style="list-style-type: none"> <li>Video should stop playing.</li> <li>Pause button should change to a Play button.</li> <li>Tooltip should change to contain "Play."</li> </ul>
Click the Play button.	<ul style="list-style-type: none"> <li>Video should resume playing where it was paused.</li> <li>Play button should change to a Pause button.</li> <li>Tooltip text should change to contain "Pause".</li> </ul>

### Controls: Volume Controls

Procedure	Expected Results
-----------	------------------

Move the mouse cursor over the video; controls will appear. Hover over the Volume button.	<ul style="list-style-type: none"> <li>Volume button should get a darker background.</li> <li>Vertical volume slider should appear above Volume button.</li> <li>Slider thumb should be at roughly 50%.</li> <li>Slider under the thumb should be a different colour than the slider above the thumb.</li> <li>Tooltip containing "Volume" should appear near the Volume button. <a href="#">FLUID-4859</a></li> </ul>
Click the Volume button. Keep mouse positioned over the button.	<ul style="list-style-type: none"> <li>Volume button should change to a Muted button (speaker symbol with an X).</li> <li>Slider thumb should drop to bottom.</li> <li>Tooltip should remain unchanged. Should say "Volume". <a href="#">FLUID-4859</a></li> </ul>
Click the Volume button again. Keep mouse positioned over the button.	<ul style="list-style-type: none"> <li>Muted button should change to back a Volume button).</li> <li>Slider thumb should return to original position.</li> <li>Tooltip should not change. Should say "Volume". <a href="#">FLUID-4859</a></li> </ul>
Use the mouse to drag the volume slider thumb control up or down.	<ul style="list-style-type: none"> <li>The colours above and below the thumb should continue to fill the available space.</li> </ul>
Slide the Volume slider up almost to the top of the slider. Click the Volume button to mute. Click the Volume button again to un-mute.	<ul style="list-style-type: none"> <li>While muted, the volume slider thumb should drop to the bottom.</li> <li>Once un-muted, the volume slider should return to where you left it, near the top of the slider.</li> </ul>
Slide the Volume slider all the way to the bottom of the slider.	<ul style="list-style-type: none"> <li>Volume button should change to a Muted button (speaker symbol with an X).</li> </ul>
Slide the Volume slider up away from the bottom of the slider.	<ul style="list-style-type: none"> <li>Muted button should change back to a Volume button.</li> </ul>
Start the video playing (either by clicking in the video area or on the Play button). While listening to the audio, slide the Volume slider up and down.	<ul style="list-style-type: none"> <li>The volume of the video should be raised and lowered according to the slider.</li> </ul>

Pause the video.

## Controls: Caption Controls

Procedure	Expected Results
Move the mouse cursor over the video; controls will appear. Hover over the Caption (CC) button.	<ul style="list-style-type: none"> <li>Caption button should get a darker background and "CC" should appear inverted (light text on dark background).</li> <li>Tooltip containing "Captions" should appear near the Captions button.</li> </ul>
Click the Caption (CC) button	<ul style="list-style-type: none"> <li>The caption menu should appear above the button.</li> <li>The Caption menu should include a list of languages (English and French) and a "Show Caption" option at the bottom of the menu.</li> <li>The English menu item should be bolded.</li> </ul>
Click the Caption button again.	<ul style="list-style-type: none"> <li>The caption menu should disappear.</li> </ul>
Click the Caption button again.	<ul style="list-style-type: none"> <li>The caption menu should reappear.</li> </ul>
Click the "Show Captions" menu item.	<ul style="list-style-type: none"> <li>The caption menu should disappear.</li> <li>The Captions button should switch to orange on a darker background.</li> <li>An overlay should appear briefly confirming that captions are turned on, then disappear. The overlay should mention the current language, English. <a href="#">FLUID-4601</a></li> </ul>
Play the video	<ul style="list-style-type: none"> <li>English captions should appear, synchronized to the audio.</li> </ul>
Click the Captions button and select French.	<ul style="list-style-type: none"> <li>Caption should continue to display, but should switch to French captions.</li> <li>An overlay should appear briefly confirming the new language choice, French (and that captions are on) then disappear. <a href="#">FLUID-4601</a></li> </ul>

Click the Captions button and select "Hide Captions"	<ul style="list-style-type: none"> <li>The caption menu should disappear.</li> <li>The captions should disappear.</li> <li>The "CC" symbol should return to dark grey text on lighter grey background.</li> <li>An overlay should appear briefly confirming that captions are turned off, then disappear. The overlay should mention the current language, French. <a href="#">FLUID-4601</a></li> </ul>
Click the Captions button and select "English"	<ul style="list-style-type: none"> <li>The caption menu should disappear.</li> <li>English captions should display with the video.</li> <li>An overlay should appear briefly confirming that captions are turned on, then disappear. The overlay should mention the current language, English. <a href="#">FLUID-4601</a></li> </ul>

Pause the video and reload the page.

### Controls: Transcript Controls

Procedure	Expected Results
Move the mouse cursor over the video; controls will appear. Hover over the Transcripts button.	<ul style="list-style-type: none"> <li>Transcripts button should get a darker background.</li> <li>Tooltip containing "Transcripts" should appear near the Transcripts button.</li> </ul>
Click on the Transcript button	<ul style="list-style-type: none"> <li>The transcript menu should appear above the button.</li> <li>The Transcript menu should include a list of languages (English and French) and a "Show Transcript" option at the bottom of the menu.</li> <li>The English menu item should be bolded.</li> </ul>
Click the Transcript button again.	<ul style="list-style-type: none"> <li>The transcript menu should disappear.</li> </ul>
Click the Transcript button again.	<ul style="list-style-type: none"> <li>The transcript menu should reappear.</li> </ul>
Click the "Show Transcripts" menu item.	<ul style="list-style-type: none"> <li>The transcript menu should disappear.</li> <li>The transcript area should appear to the right of the video area, containing English transcripts.</li> <li>The icon in the Transcripts button should switch to orange.</li> </ul>
Click the Transcript button and select French.	<ul style="list-style-type: none"> <li>Content of transcript area should switch to French transcripts.</li> </ul>
Click the Transcript button and select "Hide Transcript"	<ul style="list-style-type: none"> <li>The transcript menu should disappear.</li> <li>The transcript area should disappear.</li> <li>The icon in the Transcripts button should switch to back to white.</li> </ul>
Click the Transcript button and select "English"	<ul style="list-style-type: none"> <li>The transcript menu should disappear.</li> <li>The transcript are should appear on the right, containing English transcripts.</li> </ul>

⚠️ Todo:

- Change transcript language
- Open and close using "X" button.

### Controls: Scrubber Bar

Procedure	Expected Results
Move the mouse cursor over the video; controls will appear. Use the Captions button to show captions. Use the Transcripts button to show transcripts. Click anywhere in grey area of scrubber bar.	<ul style="list-style-type: none"> <li>From the beginning of the scrubber bar to where the click happens, the background color turns yellow.</li> <li>The start time on the time box gets updated to a reasonable new time reflecting the click location.</li> <li>The video jumps to another clip reflecting the click location.</li> <li>The caption shows up with the text that's associated with the new video clip.</li> <li>The transcript text scrolls to the transcript text that's associated with the new video clip.</li> </ul>
Click elsewhere in the scrubber bar; try different locations.	<ul style="list-style-type: none"> <li>The results described above should always happen, adjusted to be relevant to the correct spot in the timeline.</li> </ul>

Reload the page

## Transcript Navigation

Procedure	Expected Results
Reload page	
Move focus to the video player.	<ul style="list-style-type: none"> <li>When tab focus arrives at the video player, the video area should show a blue border around it.</li> <li>Play symbol overlay should not disappear. <a href="#">FLUID-4599</a></li> <li>The controls should not appear. <a href="#">FLUID-4785</a></li> </ul>
Activate and show English Transcripts	<ul style="list-style-type: none"> <li>The transcript menu should disappear.</li> <li>The transcript area should appear to the right of the video area, containing English transcripts.</li> <li>The icon in the Transcripts button should switch to orange.</li> </ul>
Hover over "David Kelley...human centered" in the transcript.	<ul style="list-style-type: none"> <li>The text "David Kelley...human centered" should appear blue.</li> </ul>
Select "David Kelley...human centered"	<ul style="list-style-type: none"> <li>"David Kelley...human centered" should now be white text on blue background.</li> <li>Yellow progress bar should appear on the left of the timeline.</li> <li>Timecode thumb should say "0:18/5:43".</li> <li>Image in video player should show text "David Kelley says.... Most experts agree." and an image of Mr. Kelley on a YouTube video.</li> <li>Video should not be playing.</li> </ul>
Press the play button on the video player	<ul style="list-style-type: none"> <li>Video should start playing from 0:18</li> </ul>
With video still playing, select transcript text below the text currently being played.	<ul style="list-style-type: none"> <li>The video and audio should jump to the position with the corresponding selected text.</li> <li>Time code should change respectively.</li> <li>The video progress bar should change respectively.</li> </ul>

## Controls: Full-Screen Controls

Procedure	Expected Results
Reload the page	
Move the mouse cursor over the video; controls will appear. Hover over the Full-screen button.	<ul style="list-style-type: none"> <li>Full-screen button should get a darker background.</li> <li>Tooltip containing "Full screen" should appear near the Full-screen button.</li> </ul>
Click the Full-screen button	<ul style="list-style-type: none"> <li>The video should switch into full-screen mode.</li> <li>The video controls should be visible along the bottom of the screen.</li> <li>The Full-screen button icon should switch to a 'small-screen' icon.</li> <li>A message that states "Press ESC to return to exit full screen" (or similar) should appear along the top.</li> </ul>
Do not move the mouse or press any keys for a short time.	<ul style="list-style-type: none"> <li>The controls should disappear.</li> </ul>
Move the mouse.	<ul style="list-style-type: none"> <li>The controls should reappear.</li> </ul>
Test the mouse functionality as described above: <ul style="list-style-type: none"> <li>Play / pause</li> <li>Volume</li> <li>Captions</li> </ul>	<ul style="list-style-type: none"> <li>All controls should function as they would in non-full-screen mode. Example: <ul style="list-style-type: none"> <li>Tooltips appear properly</li> <li>Button colours change according to state</li> <li>Controls work as expected</li> <li>Positioning and rendering appears correct</li> <li>etc.</li> </ul> </li> </ul>
Play the video	<ul style="list-style-type: none"> <li>Video should play.</li> <li>Play button should change to a Pause button.</li> <li>Tooltip text should change to contain "Pause".</li> </ul>

While video is playing, click the Full-screen button again.	<ul style="list-style-type: none"> <li>The video should switch back to its original size.</li> <li>Video should continue playing during this transition</li> </ul>
Stop video and click the Full-screen button again.	<ul style="list-style-type: none"> <li>The video should stop playing.</li> <li>switch into full-screen mode again.</li> <li>remain in a stopped state</li> <li>controls visible, with "ESC to exit full screen" message at top</li> </ul>
Press the Escape key.	<ul style="list-style-type: none"> <li>The video should switch back to its original size.</li> </ul>

## Keyboard Functionality

### Keyboard Play/Pause

Procedure	Expected Results
Load the "One video player per page" demo in a browser window.	<ul style="list-style-type: none"> <li>Page should show video player container.</li> <li>Video should not play automatically.</li> <li>Video player container should show a symbol overlay. <a href="#">FLUID-4599</a></li> <li>Control menu should not be visible.</li> <li>Transcript area should not be visible.</li> <li>Captions should not be displayed.</li> </ul>
Using only the Tab key on the keyboard, move focus to the video player.	<ul style="list-style-type: none"> <li>When tab focus arrives at the video player, the video area should show a blue border around it.</li> <li>Play symbol overlay should not disappear. <a href="#">FLUID-4599</a></li> <li>The controls should not appear. <a href="#">FLUID-4785</a></li> </ul>
Press the Space key.	<ul style="list-style-type: none"> <li>Play symbol overlay should disappear. <a href="#">FLUID-4599</a></li> <li>Video should start playing.</li> <li>Play button should turn into a Pause button.</li> </ul>
Press the Space key again.	<ul style="list-style-type: none"> <li>Play symbol overlay should not reappear. <a href="#">FLUID-4599</a></li> <li>Video should stop playing.</li> <li>Pause button should turn into a Play button.</li> </ul>
Press Space key	<ul style="list-style-type: none"> <li>Play symbol overlay should not reappear. <a href="#">FLUID-4599</a></li> <li>Video should stop playing.</li> <li>White on Blue background pause button should be replaced by a play button.</li> </ul>
Repeat the above-mentioned Play/Pause tests using the Enter key instead of Space.	<ul style="list-style-type: none"> <li>Results should be the same.</li> </ul>

Reload the page.

### Keyboard Controls: Play Button

Procedure	Expected Results
Reload the page	
Using only the Tab key on the keyboard, move focus to the video player.	<ul style="list-style-type: none"> <li>When tab focus arrives at the video player, the video area should show a blue border around it.</li> <li>Play symbol overlay should not disappear. <a href="#">FLUID-4599</a></li> <li>The controls should not appear. <a href="#">FLUID-4785</a></li> </ul>
Press Tab once more.	<ul style="list-style-type: none"> <li>The controls should appear. <a href="#">FLUID-4785</a></li> <li>The Play button should appear white on a blue background.</li> <li>Play symbol overlay should not disappear. <a href="#">FLUID-4599</a></li> </ul>

Press Space key	<ul style="list-style-type: none"> <li>• Play symbol overlay should disappear. <a href="#">FLUID-4599</a></li> <li>• Video should start playing.</li> <li>• Play button should turn into a Pause button.</li> <li>• Pause button should appear as white on blue background.</li> <li>• Tooltip should change to say "Pause" <a href="#">FLUID-4743</a></li> </ul>
Press Space key	<ul style="list-style-type: none"> <li>• Play symbol overlay should not reappear. <a href="#">FLUID-4599</a></li> <li>• Video should stop playing.</li> <li>• White on Blue background pause button should be replaced by a play button.</li> <li>• Tooltip should change to say "Play" <a href="#">FLUID-4743</a></li> </ul>
Repeat the above-mentioned Play/Pause tests using the Enter key instead of Space.	<ul style="list-style-type: none"> <li>• Results should be the same.</li> </ul>

Reload the page.

### Keyboard Controls: Volume Controls

Procedure	Expected Results
Reload the page.	
Using only the Tab key on the keyboard, move focus to the video player.	<ul style="list-style-type: none"> <li>• When tab focus arrives at the video player, the video area should show a blue border around it.</li> <li>• Play symbol overlay should not disappear. <a href="#">FLUID-4599</a></li> <li>• The controls should not appear. <a href="#">FLUID-4785</a></li> </ul>
Press Tab two more times.	<ul style="list-style-type: none"> <li>• The controls should appear. <a href="#">FLUID-4785</a></li> <li>• The Volume button should appear white on a blue background.</li> <li>• Volume slider should appear vertically above the volume button.</li> <li>• Slider thumb should be at roughly 50%.</li> <li>• Slider under the thumb should be a different colour (i.e. yellow) than the slider above the thumb (i.e. white).</li> <li>• Tooltip should say "Volume". <a href="#">FLUID-4859</a></li> </ul>
Press and hold Down arrow	<p>*The volume slider should move down. *Yellow colour under the slider should decrease while white colour above slider should increase.</p>
Press and hold Up arrow	<p>*The volume slider should move up. *Yellow colour under the slider should increase while white colour above slider should decrease.</p>
Press Enter	<ul style="list-style-type: none"> <li>• Volume button should change to a Muted button (speaker symbol with an X).</li> <li>• Slider thumb should drop to bottom.</li> <li>• Tooltip should say "Volume". <a href="#">FLUID-4859</a></li> </ul>
Press Enter again (Focus should still be on Volume button).	<ul style="list-style-type: none"> <li>• Muted button should change to back a Volume button.</li> <li>• Slider thumb should return to original position.</li> <li>• Tooltip should not change and should still say "Volume". <a href="#">FLUID-4859</a></li> </ul>
With Volume focused, press Up arrow until the slider is almost to the top of the slider. Press Enter key button to mute. Press Enter key button again to un-mute.	<ul style="list-style-type: none"> <li>• While muted, the volume slider thumb should drop to the bottom.</li> <li>• Once un-muted, the volume slider should return to where you left it, near the top of the slider.</li> </ul>
Press Down arrow so slider is all the way to the bottom.	<ul style="list-style-type: none"> <li>• Volume button should change to a Muted button (speaker symbol with an X).</li> </ul>
Slide the Volume slider up away from the bottom of the slider.	<ul style="list-style-type: none"> <li>• Muted button should change back to a Volume button.</li> </ul>
<p>*Start the video playing (either by clicking in the video area or on the Play button).</p> <p>*Put focus back onto the Volume button by pressing Tab until focused.</p> <ul style="list-style-type: none"> <li>• While listening to the audio, press Up and Down arrow keys to slide the Volume slider up and down.</li> </ul>	<ul style="list-style-type: none"> <li>• The volume of the video should be raised and lowered according to the slider.</li> </ul>

### Keyboard Controls: Caption Controls

Procedure	Expected Results
