Pressbooks Accessibility Analysis

Work in Progress

This document is work in progress.

Notes

Colour and Contrast

- Sidebar hover text color #d4002d not AAA against white background
- Link focus styling is not obvious and same as hover styling.

Tabbing

Adding Content

- Adding a new Chapter to a Part places it into the chosen Part. But using the "Add New Chapter" button changes the Part into a different part. Example:
    - There are two parts: "Act 1" and "Act 2".
    - Go to Text > Organize > Add Chapter "Scene 1" to "Act 2"
    - Publish "Scene 1". Immediately choose the "Add New Chapter" button which appears at the top.
    - Notice that the new chapter entry page defaults the Part drop-down to "Act 1" not "Act 2" as expected.
- Text editor
    - The non-graphical editor does not have structure tags as buttons on toolbar (i.e. H1, H2, H3)
- SVG image format is not supported.

Date Chooser

- Tabbing to text fields with date chooser opens date chooser, but it's not possible to put focus into the date chooser. Pressing enter picks the current date in the chooser.

Usability

- Save button is inconsistent locations and behaviour
    - Sometimes Save is at top-right sidebar, sometimes at bottom
    - Some pages don't have explicit save buttons even though you can edit the page.
- Parts must have body text - won't allow it to be blank.

Questions

Wish List

- Markdown batch importer
